

## Sharing Information

Family meetings are a great time when all family members get together to share information and make decisions.

- **Schedules**—the members can coordinate their schedule for the week to ensure that everyone’s needs get met.
- **Praise**—parents can let everyone know what achievements or accomplishments have been made.
- **Really important things**—parents can give their children a chance to talk about what happened in school, what they discussed in class, problems they may be having, and things they’d like to do as a family.
